

# Iowa Community College Statewide Education Outcomes Placement Report

## Iowa Department of Education

The Iowa Community College Statewide Outcome Report documents the educational and employment outcomes of students completing community college certificate, diploma, and associate degree programs, including the number of awards, time-to-degree, retention, migration, transfer to four-year institutions, employment and wages, career clusters, and career pathways. The report for the latest statewide cohort, data tables, and definitions can be downloaded here [Iowa Community Colleges | Iowa Student Outcomes](#).

To properly conduct research for this report, data criteria were established based on less than 22 credit hours (“short-term”) or 22 or more credit hours (“long-term”) for associate, diploma, and certificate awards. All data were extracted from the Department’s Community College Management Information System (MIS) and grouped based on this threshold, along with each credential’s award date. The award date is referenced throughout this report as academic year (i.e., grouped September 1, 2020, to August 31, 2021, is AY 2021). Students who received awards in AY2019, 2020, 2021, 2022 and 2023 were analyzed.

Once extracted from the MIS, data were sent by annual cohort to the National Student Clearinghouse (NSC) to identify which students continued their education after receiving a community college award. These individuals may have transferred from one community college to another, continued their education at their current location or transferred to a four-year institution. Transfer students were analyzed by college type (two- or four-year, and private or public), and by transfer location, allowing for the study of graduate out-migration (leaving Iowa).

All wages for this report originate either from the Iowa UI wage database or SWIS network of state UI wage databases. The UI wage records do not cover employers exempt from paying UI tax, such as federal employees, members of the armed forces, the self-employed, proprietors, unpaid family workers, church employees, railroad workers covered by the railroad unemployment insurance system and students employed in a college or university as a part of a financial aid package. The median annual wage data (adjusted for 2024 inflation levels) is provided for completers during their first year after completing an award.

Other limitations of the data are contained in the statewide report. To protect individual identities, data is suppressed if the number of employed in a cell is less than three.

Contact the IVCCD Office of Institutional Research if questions.
